FRUIT TREE STOCKS—AMERICAN GROWN

Apple Seedlings

We are now grading our seedlings, and can make prompt shipment.

Our experience in growing seedlings extends over a period of fifty years. By growing them on new ground, giving them constant care by thorough cultivation and spraying during the growing season, we are able to produce a healthy and strong growth. Our large list of satisfied customers is sufficient proof that our stock and grades please the trade.

In addition to our usual supply of Kansas Seedlings grown in the Kaw Valley, this year, we are also able to furnish our customers with seedlings grown in the famous Yakima Valley of Washington if preferred.

On early orders in some sections of the country we can give customers the advantage of car load rates.

No. 3, about 2/16 inch.....	10 00
No. 4, under 2/16 inch.....	5 00

SEEDLING LIST, DECEMBER 6, 1926

Below is what Prof. F. C. Reimer of the Oregon Agricultural College says in regard to Calleryana Pear Seedlings:

"Calleryana has shown a higher degree of resistance to blight in the trunks and roots than any of the other species suitable for rootstocks. In this species only 9.1 per cent of the trees which were inoculated in the roots blighted.

Young trees on this stock are more vigorous than those on any other species. This appears to be the most promising rootstock."

PEACH SEEDLINGS

	Per 1000
No. 1, 3-16 inch and up	\$ 15.00

FRUIT TREE STOCKS, FRENCH GROWN

We wish to call attention to the fact that these goods are sold net at Shenandoah. We take all risk of transportation and pay all charges from France to this place. This is a very important point for customers to remember.

Sometimes there is quite a loss in these long shipments, but this does not effect the customer, as we open the boxes and grade out the damaged seedlings and guarantee our stock to be in good condition when it is delivered to the forwarding agent at Shenandoah.

We are prepared, however, to quote prices on application F. O. B. cars, Angers, France, and customer paying duties and charges to destination, also taking all risks, or, we will quote prices out of customs at New York and ship from there direct.

A government inspector is stationed at Shenandoah most of the winter and he inspects all imported stocks.

	Per 1000

ROOT GRAFTS

Unless you have experienced help, you will find it cheaper and better to have us do your grafting. We have a large force of expert men, who devote their time during the winter months exclusively to this department.

We are prepared to put up grafts of any style or length wanted, and make the price accordingly. We use the best materials; orchard scions are used extensively and selected hardy seedlings grown by us from the best crab seed we can procure.

Each order is grafted by itself and packed separately until shipped. They are repacked and inspected several times during the winter so they are in the best of condition at shipping time.

IT IS VERY IMPORTANT THAT ORDERS BE PLACED EARLY. We can give them closer attention and supply a larger list of varieties than later in the season. Our grafting season begins about the first of January and continues through out the winter.

Grafts should be planted out early in the Spring, in well prepared ground. In our own planting, we set them about eight inches apart in the row, making the row three feet six inches wide. It is very essential that the earth be well pressed about them.

As our grafts are put up in bunches of one hundred, do not order a less amount of any one variety. We will be glad to mail samples upon request.

APPLE AND CRAB PIECE ROOT GRAFTS

Piece root grafts are made by using about six inches of scion and about one-half inches of root. They are tongued together and securely wrapped at the union, with waxed thread, making the entire graft about eight and one-half inches long.

	Per 100	Per 1000
5,000 and up.....	\$ 4.25	\$ 40.00
1,000 to 5,000.....	4.50	42.50

APPLE AND CRAB WHOLE ROOT GRAFTS ON NO. 1 STRAIGHT OR BRANCHED SEEDLINGS

This style of graft is made by using about six inches of scion and the entire seedling making union at the collar and wrapping with waxed thread which holds it firmly until calloused. Many nurserymen prefer to plant this kind of graft, claiming that they get a larger growth owing to the well formed root system.

	Per 100	Per 1000
5,000 and up.....	\$ 2.00	\$ 15.00
1,000 to 5,000.....	2.50	20.00
